Experience

Texas Power Consultants, LLC offers our clients over sixty years of experience in the Texas electricity industry. By utilizing our comprehensive knowledge of the wholesale/retail electricity markets, regulated tariffs, and generation/distribution system, we provide superlative solutions for power procurement, improving energy efficiencies, and client care.

Power Procurement - Insight and Strategy

The TPC team possesses a unique insight into the power procurement process that others simply cannot provide. We employ a proven power procurement strategy developed by working directly with energy traders, pricing analysts, and other industry resources. Our team negotiated some of the first electricity contracts ever signed in the Texas deregulated electricity market. We leverage this experience and strategy to obtain the best possible price and contract for our client. *Once a contract is signed, our real work begins!*

Complete RFP/RFQ services, which include consultation, development, preparation, and management, are offered for those clients who require the use of this procurement process.

WE DO NOT HAVE ANY EXCLUSIVE AGENT AGREEMENTS WITH ANY SUPPLIERS! WE WORK FOR YOU!

Energy Efficiency - Knowledge and Expertise

Utilizing both our knowledge and a network of industry experts, TPC provides analysis and solutions for improving energy efficiency, power factor analysis/ correction, load management analysis/implementation, and assistance with other energy management services to address specific needs.

Client Care - Accessible and Reliable

From serving the electricity needs of one of the nation's largest transportation companies, large and small commercial businesses, and access to highly competitive residential rates, the client is our main focus. We provide accessible and reliable client service. Clients can depend on TPC to use our knowledge and extensive network of industry contacts for swift resolution of client questions or issues. We are the client advocate on all issues involving the retail energy provider (REP) and/or the transmission distribution supply provider (TDSP) utilizing our skills, expertise, and networking capabilities for issue resolution. Client care services include bill auditing, tariff rate analysis, dispute resolution, service establishment/removal, and assistance with outage notification/ service restoration.
